## **<<Renewable Energy and the third industrial revolution >>**

by Guy WEIDER , Founding member of ErCiSol.

A conference organized by the IIM alumni association.

At the time of the third industrial revolution, and aware of the limitation of fossil fuels (oil, gas, uranium), the ErCiSol SAS was created to develop innovative solutions for Energy Transition. It produces and distributes renewable energy enabling a maximum number of people to participate in the company's management through democratic governance, citizenship and solidarity and contributes to energy independence.

**Speech in english**

**Guy WEIDER**

He graduated from the National Institute of Applied Sciences in Lyon. He worked for 12 years with Schlumberger Petroleum Exploration and ABB Industrial Control. Today he is a consultant on renewable energy and sustainable development for ErCiSol (Renewable Energy and Responsible Citizens).
